## QUALITY PLAN

### QUALITY PLAN

Quality Planning is a critical part of any project. It enables to agree upon a set of quality targets with our customers. It then helps the Company to monitor to control the level of quality produced by the project, to ensure that they meet the quality targets set. By using this quality plan, the company can set quality targets and ensure that their project produces deliverables which meet their customers needs, thereby ensuring the company success.

**ALRUBAYEA TECHNICAL AND CLEANING SERVICES** Quality Plan helps schedule all of the tasks needed to make sure that the project meets the needs of Main Contractors Quality Plan. It comprises of two parts: Quality assurance Plan that lists the independent reviews needed and the Quality Control Plan that lists the internal reviews needed to meet the quality targets. By using Quality Assurance and Quality Control techniques, it can create a comprehensive Quality Management Plan for their project.

#### **QUALITY PLAN SET QUALITY TARGETS BY:**

- Identifying the Main Contractors requirements
- Listing the project deliverables to be produced
- Setting quality criteria for these deliverables
- Defining quality standards for the deliverables
- Gaining the Main Contractors agreement with the targets set

#### **QUALITY PLAN USE TO MONITOR AND CONTROL QUALITY BY:**

- Identifying the Main Contractors Quality Control tasks needed to control quality
- Creating a Quality Control Plan by Scheduling the Control activities
- Listing the quality assurance activities required to assure quality
